Adult vital signs chart

Six timed observation rows with linked method, response and follow-up notes on page 2.

Patient identifiers required by the service

Encounter / location

Sheet ID (repeat on both pages)

Monitoring plan / prescribed targets and source / observation frequency / review owner

Row	Observation date + time	Temp °C or °F	Pulse / HR beats/min	Resp. rate breaths/ min	BP mmHg	SpO2 %	Room air / O2 device	O2 flow L/min	Set O2 conc. % if known	Consciousness method in note	Observer ID	Note ref.
01												
02												
03												
04												
05												
06												

Observer key: enter each ID, full name and role. Use the linked note for entry time and authentication.

Record actual units and settings. Flow does not establish concentration. Mark missing readings explicitly.

Link method, site, position, equipment, symptoms and response on page 2. Continue on a new identified sheet.

Observation context and response notes

Match sheet ID and patient identifiers to page 1. Link each note to its observation row(s).

Patient identifiers required by the service

Encounter / location

Sheet ID (repeat on both pages)

Use a linked continuation record when space is insufficient. Check typed text after saving and before printing.

Note ID / obs. rows	Measurement conditions Method, site, position, equipment, signal concerns or missing readings	Change and actual response Time, findings / symptoms, recipient, response and action completed	Owned follow-up and authentication Owner, checkpoint, backup; outcome or pending; author / role and entry date / time
